

Holitech ePaper

Holitech ePaper

HOLITECH
Europe
Make information happen.

Holitech ePaper Displays offer a lot of advantages, which other display technologies can't:

Paper-like feeling and readability

ePaper is purely reflective and looks like real paper, even in bright sunlight. And like Paper it can clearly be seen from all directions.

Lowest Power consumption

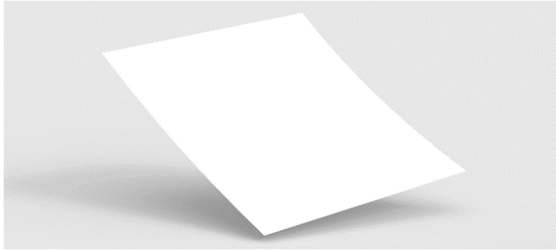

ePaper Displays retain their content nearly forever, without any power. Energy is only needed to change the picture.

EMI friendly

Once the display content is written, the electronics can be turned off, no fields are emitted

Holitech ePaper

Thin and light weight

ePaper are just about 1mm thin, again almost like real paper. They require almost no space and weigh just a few grams.

Wide product range

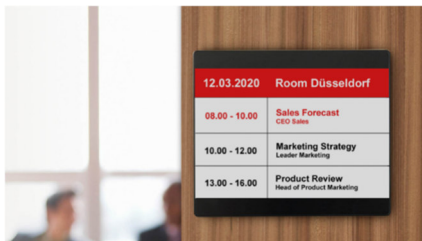

Holitech ePaper are available in different sizes from 1,3" to 42".

Different color combinations available

Holitech ePaper Displays are available in B/W, B/W/R and B/W/Y and soon also multi-color

ePaper Displays are the perfect choice, when only limited power is available and the display content stays the same for a long time. Typical applications are all kind of signs, smart home applications, meters or wearables:
