

Silicon Labs EFM8™ Busy Bee - The "busy bee" of the 8-bit microcontrollers

- Thema:** A "busy bee" is the high-speed and ultra-low-power microcontroller EFM8™ Busy Bee series by SILICON LABS. The Busy Bee family's strengths lie especially in cost-sensitive applications where analogue and communication peripherals with low power consumption are required.
Watch this live online seminar for a deep insight into the technology and functionality of the Busy Bee series. Using a live demo of the starter kit, you will learn the first steps in programming and integration into your application.
- Termin:** 16. November 2021
- Zeit:** 09:30 Uhr - 11:00 Uhr
- Ort:** GoToWebinar
- Seminarsprache:** Englisch
- Kosten:** Die Teilnahme am Seminar ist kostenfrei.
