RE :impact of Ukraine conflict on supply chain

we would like provide our feedback from Promate's point of view about this topic as below

1) do you yourself have facilities in Russia or Ukriane?

ans: no

2) do you buy machines, components or materials from these countries which are necessary to produce your produces.

ans: no

3) do you use transportation routes through these countries?

ans: shipment between Promate and Glyn, we follow FOB TW term, forwarder Logwin is assigned by Glyn.

I think their freight route doesn't through these countries you concern, or if you have question, I suggest check with Logwin directly,

4) which potential impact do you see for our production, and what measures do you take to stabilize the supply chain.

and: for AUO display and Promate touch products, the upper components are from China and TW, thus, in our point of view, we see less impact about our product supply.

FYI.

With Best Regards,

Bea Chang
