Subject: No business impact on SHM by Corona Virus

Dear our valued customer,

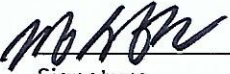

As SkyHigh Memory uses factories for wafer production and assembly/test/shipping in South Korea and Thailand, there is currently no business impact on product supply, but we are monitoring the situation on a daily basis and will advise if there are any changes.

Meanwhile, our sales team is based in Hong Kong and running its daily operation without any disruption with support by teams in Korea and Bangkok, and if needed in a worse situation, the team is able to manage our order book remotely from outside the office or from Korea and Bangkok.

We always appreciate your support to us and will keep updating the status if there is any new progress.

Best Regards,

Harrison Chung, Global Sales VP
