Ukraine Conflict Statement

Dear Valued channel partner,

AAEON is saddened by the current escalation of the situation in Ukraine and Russia which has reached an unexpected level.

We understand that our partners are now raising concerns and asking for potential impacts regarding our mutual business. Therefore, we would like to provide this statement:

AAEON Technology doesn't have any production facilities, warehouses in Russia or Ukraine. Furthermore, we don't buy any machines, components, or materials from these countries. Our transportation routes don't go through these countries. We don't see any potential impact for our production.

Yours sincerely,

AAEON Technology Europe B.V.

Victor Lai (Managing Director)
